

WELCOME

Dear Carwash Owner/Operator,

Since 2005 the NCPCWA has been working to promote the goals of carwash owners and operators. We aim to provide owners and operators with benefits that address issues specific to North Carolina and the carwash industry.

NCPCWA Was originally founded to promote the contributions professional carwashes make to our communities. Today there is an ongoing need to promote the carwash industry to municipalities and governments highlighting our environmental responsibility and lobbying for our business needs.

The NCPCWA Board would like to invite you to join our Association. It is through shared interaction and combined efforts that we can take larger steps toward accomplishing our goals.

Please contact any of our Board Members if you have questions about joining the NCPCWA.

We look forward to hearing from you soon.

Thank you from the NCPCWA Board Members.

President—Vanessa Deering

The purpose of the Vehicle Wash Certification Program is to promote best management practices and recognize year-round conservation efforts. This certification is recognized by the North Carolina State Legislature and has been since its inception in 2005.

This program is responsible for promoting NC Statute G.S. 143-355.2(hl) and is endorsed by NC DENR. This legislation protects certified carwashes and is only available to NC Professional Carwash Association Members.

The Vehicle Wash Conservation Program is a voluntary program in which carwash owners/operators may request certification from the NC Professional Carwash Association. The principal incentive to the professional vehicle wash owner is to receive recognition for proactively conserving water, not only during a drought but also throughout the year.

Certified members are allowed to continue washing during declared drought emergencies.
